

Novapoint Terrain

Novapoint Terrain is an independent module for defining and calculating earthworks. It can be used with all types of site development like industrial estates, housing estates, sports grounds, parks, open cast mining, quarrying etc. Novapoint Base together with Novapoint Terrain gives you general mapping functions, the Novapoint Terrain model for import of data, triangulation, grid modelling and contouring and special functions for calculation of volumes between surfaces.

More information is available at the [Novapoint web site](#)
