## TO NOVAPOINT GO USERS

To log in to your Novapoint GO today, you use Vianova ID. We are now moving your license authentication from Vianova ID to Trimble ID. To keep using your Novapoint GO solution, please follow the steps outlined below to migrate your Vianova ID to Trimble ID:

How to migrate?

First you need to create a username and password for your Trimble ID. If you don't have a Trimble ID already, you can create one here:

Create your Trimble ID

Trimble.

Create your account

| Per |

| Olsen |

| per_olsen@email.no |

| .... |

| ¥63pm | ⟳

| Enter the above text |

Create new account

Go back

Link my Vianova ID

After you have created a Trimble ID account, you will receive an e-mail to verify your Trimble ID.

Next step is to map the Trimble ID with your Vianova ID here and confirm your ID:

Link to my Vianova ID

Please fill out your Vianova ID

| piedho |

| .... |

→ Link my Vianova ID

Reset your password »

Note: Both sign-in methods will be available for a period of time, but we encourage all users to create their Trimble ID and link it to your existing Vianova ID within the coming month. Vianova ID will be phased out shortly.

When you have linked your Vianova ID and Trimble ID, open Novapoint GO, sign out, and choose Trimble ID as the sign in method. Sign in with your new Trimble ID, and select "remember password". From now on, you will automatically log in with your new Trimble ID account.
